## SUMMARY

---

I'm a Computer Science student and Full Stack Developer, passionate about building clean, modern web apps. Always curious, always learning, and excited to turn ideas into real projects.

## SKILLS

---

<b>Languages</b>	Javascript, Typescript, HTML, CSS
<b>Databases</b>	PostgreSQL, NoSQL(MongoDB)
<b>Technologies</b>	React, Next.js, Node & Express.js, Mongoose, Prisma, Caching (Redis)
<b>Cloud</b>	Docker, Git, Github, CI/CD
<b>Others</b>	Microservices Architecture, Design Patterns, REST API Design

## PROJECTS

---

### Streaming App

[Code](#) [Live](#)

- Built a full-stack YouTube-style video sharing platform with React, Express, and MongoDB, supporting video streaming, playlists, likes, comments, and subscriptions.
- Video Upload & Streaming System: Users can upload their videos, and others can stream them seamlessly on the platform.
- User Interaction Features: Users can like, comment, share, and subscribe to content. They can also create playlists and save videos to watch later, making the platform more engaging and personalized

### Ecommerce App

[Code](#) [Live](#)

- A full-stack e-commerce platform built with Next.js, Express.js, and PostgreSQL.
- User – Secure authentication with JWT & refresh tokens, product browsing, shopping cart with variants, seamless checkout with payment & address management, order tracking, profile updates, and coupon support.
- Seller & Admin – Comprehensive dashboards with product & inventory management, order processing, coupon creation, sales & system-wide analytics, user role management, seller approval, access control, and configurable platform settings.

## EDUCATION

---

**Daffodil Polytechnic Institute**  
Computer Science

23 – 26

**Secondary School Certificate**  
Commerce

19 – 21

## LANGUAGES

---

Hindi, Bengali
